

Cervical Health

Awareness Month

Things to know...

MORE THAN 13,000 WOMEN IN THE UNITED STATES ARE
DIAGNOSED WITH INVASIVE CERVICAL CANCER EACH YEAR

Testing:

1. Pap smear, which you can start at 21 years of age
2. Human papillomavirus (HPV) test

HPV Vaccine:
Prevents new infections but
does not treat existing
infection/diseases

**CONTACT YOUR HEALTH CARE PROVIDER WITH CONCERNS AND ANY
FURTHER INFORMATION ABOUT THIS DISEASE**
